

CLEFT HOSPITAL PAKISTAN

ANNUAL REPORT 2017

Rebuilding Smiles

CHAIRMAN MESSAGE

“He, Who Created death and life, will test you, as to whose work is excellent among you...” (67:2) Al-Quran

With the mission to deliver international standard treatment facility to every cleft lip and palate patient. Cleft Hospital Pakistan is a World Class Centre catering to all the needs required for treatment of cleft lip and palate under one roof. A group of nationally and internationally renowned Cleft surgeons, Orthodontists, speech therapists, Audiologists and paramedics have pooled their services to provide state of the art Cleft treatment services and trainings. Our partners in Pakistan an abroad are striving hard to develop this platform as a Health service delivery Model in Pakistan. Let us join hands to strengthen and expand this unique facility with the mission to change lives by filling the gaps. Let us please our Creator and do what He expects from us. As it is said:

“Those who are beneficial for others are best among the people.”

Dr. Ijaz Bashir

OUR DEVELOPMENT OVER THE YEARS

The Cleft Hospital Pakistan has been treating children with cleft lip/palate since 2010. To date, no center or hospital is providing specialized cleft services to patients starting birth.

While there has been a continuous need for our care and quality treatment, how it is delivered continues to change. We have developed online registration system where most of our patients and their families register and are guided online before proper meeting with the health care providers.

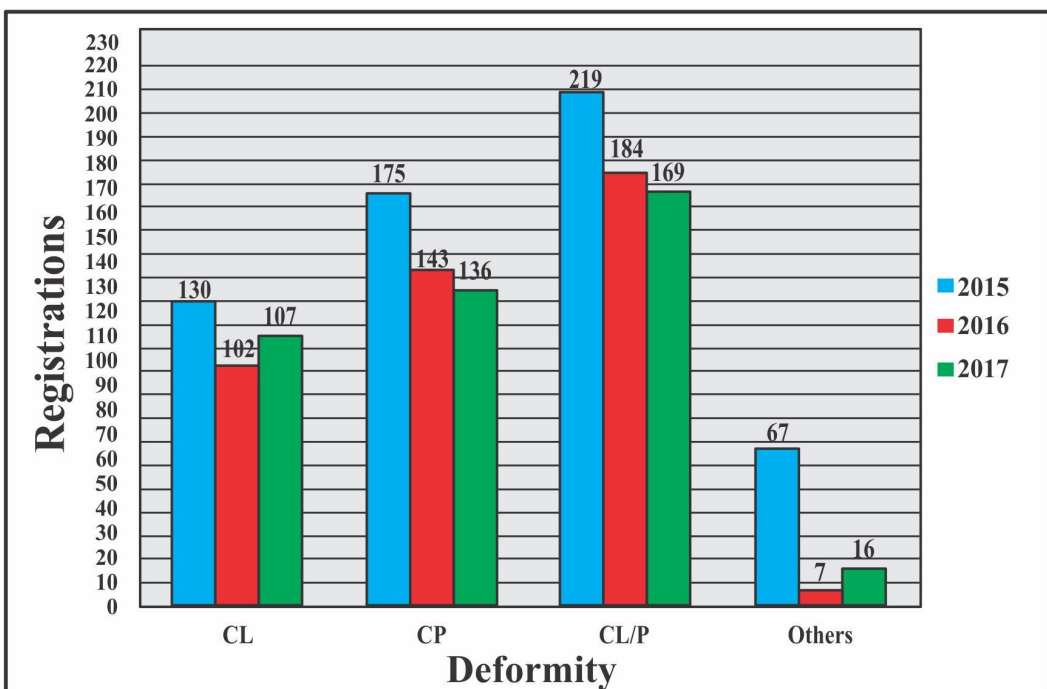

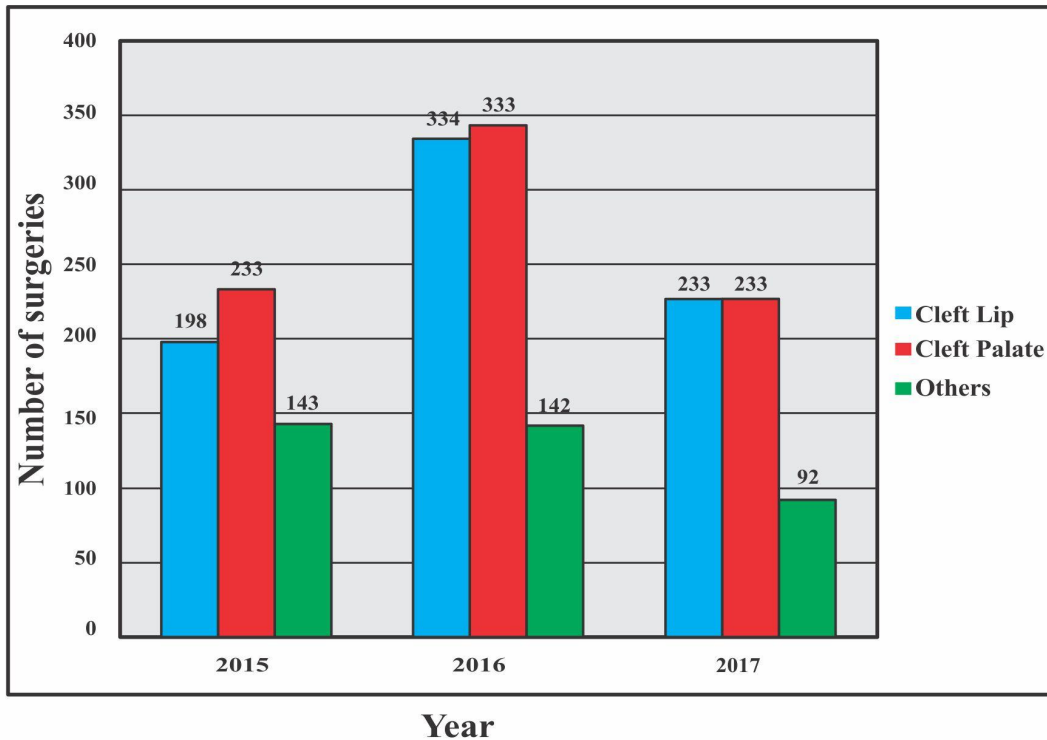

Over the years, changes in technology and treatment options have introduced new professionals to our team, such as a maxilla-facial surgeon and a psychologist. Miss Ayisha joined our team in 2015 as a Research Scientist. Her commitment to the Hospital means that we now have started our research department and initiated various studies on cleft lip/palate. A number of these studies have been published since the department's inception.

We are thankful for the many people who ensure that the Hospital continues to thrive and grow in its mission year after year, including a hardworking board of trustees looking to the Hospital's future with a new strategic plan. We are also grateful to all who support us with grants and donations.

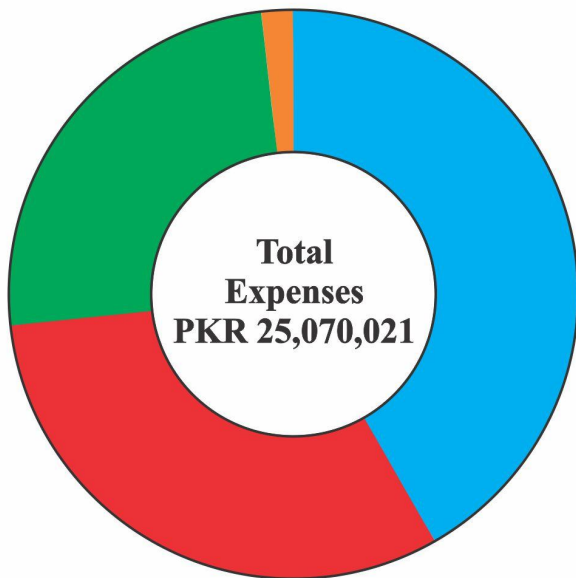

We are proud to be part of an institution with a history and mission of service. We hope this year you will support our work in any way you can.

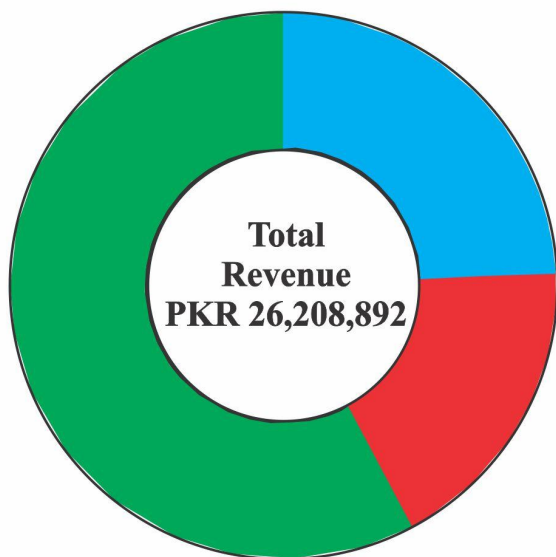

FACTS AND FIGURES

FACTS AND FIGURES

- Clinical 10,464,132
- Depreciation 7,868,047
- Administration 6,292,220
- Marketing 438,040
- Financial Charges 7,582
